
light:night

portable luminary

Recharge the light:*night* for 12 hours prior to first use.

When off the recharging cradle, the light:*night* button cycles through bright white light, bright colored light and off.

Place the light:*night* on the recharging cradle and it emits a dim white and colored glow to signify recharging.

When the light:*night* is removed from the cradle or rotated such that the contacts break connection, the light:*night* will glow bright white.

The light:*night* is not a toy and is not suitable for wet locations
